Kerberos KEYTAB File for AADS

A Service Account for IWA AADS with no special rights is needed.
The file has to be created on a Windows Domain Controller with Domain Admin Rights.
On cmd run:

```
setspn -S HTTP/<FRONT-END FQDN> <Domain user login> ktpass -out
LocationOfKTfile -mapuser user@DOMAIN.SUFFIX -princ
HTTP/serverFQDN@DOMAIN>SUFFIX -ptype KRB5_NT_PRINCIPAL -pass +rndPass -
crypto all -kvno 0
```
