Upgrade SBC by Datamigration

Install Uberutility on existing SBC/EMS

```
mkdir /usr/local/ipcs/urutmp
cd /usr/local/ipcs/urutmp
mv /home/ipcs/sbce-10.2.1.0-101-24795_uberutility-
a3f204497316292399c3483411a761ef.tar.gz /usr/local/ipcs/urutmp/
tar -zxvf /usr/local/ipcs/urutmp/sbce-10.2.1.0-101-24795_uberutility-
a3f204497316292399c3483411a761ef.tar.gz
./pre-upgrade-check
```

Take Migration Backup

```
/usr/local/ipcs/peon/venv/bin/python ursbce.py --takemigratebackup --
filename_with_path="$(hostname)-$(grep -i MGMT_IP
/usr/local/ipcs/etc/sysinfo | cut -d = -f2)-backup-$(cat /etc/sbce-
version).tar.gz"
mv *.tar.gz /home/ipcs/
chmod 777 /home/ipcs/*.tar.gz
```

Restore Backup on new Server:

```
cd /archive/backup/upgrade
mv /home/ipcs/sbce-backup-<sbceversion>-<sbce hostname>.tar.gz ./
/usr/local/ipcs/icu3/scripts/ursbce.py --restoremigratebackup --
filename_with_path=/archive/backup/upgrade/sbce-backup-<sbceversion>-<sbce
hostname>.tar.gz
```
