

tracesbc without Root Access

Run the following command as root SBC Cli:

```
sed -r -i 's/(\^Cmd_Alias  
IPCS_COMMANDS.*[\^t][\^r][\^a][\^c][\^e][\^S][\^B][\^C])$/\1\, \\/usr\/local\/tracesbc  
\bin\/traceSBC/g' /etc/sudoers.d/001_sbce  
alias tracesbc='sudo /usr/local/tracesbc/bin/traceSBC'
```

After running the command tracesbc is running without root password.
